UNIVERSITY

EpiHealth

Strategic Research Area Epidemiology for Health at Lund and Uppsala Universities

EpiHealth research questions:

- How do genes interact with the environment for risk of disease?
- What links dietary intake, gut microbiota and organ function?
- How does early life factors influence adult health?
- Why do patients with the same disease have different prognosis?
- How could health economy and social epidemiology inform clinical decision making?

What is the EpiHealth Network?

The network commenced in 2010 when SRA EpiHealth started. It now includes both doctoral students, postdoc's, senior researchers and other personnel active in epidemiological research at Lund and Uppsala universities.

Participation in the network is voluntary and this requires an active application. As epidemiological research is very broad and also includes people who work with biostatistics, postdoc's, PhD students, research students, etc., we welcome a broad range of members in our network.

The ambition is that the network can serve as a basis for stimulating exchange between researchers promoting interdisciplinary research and new project ideas.

The EpiHealth-Elderly cohort

SRA EpiHealth is the host of the population based cohort EpiHealth-Elderly (n=25 104) of middle aged and elder subjects aiming to identify predictors of healthy aging. The data includes questionnaire, anthropometrics, cognitive test, biobank and register data. For further information on data retrieval: www.epihealth.lu.se

As a member of the network you get:

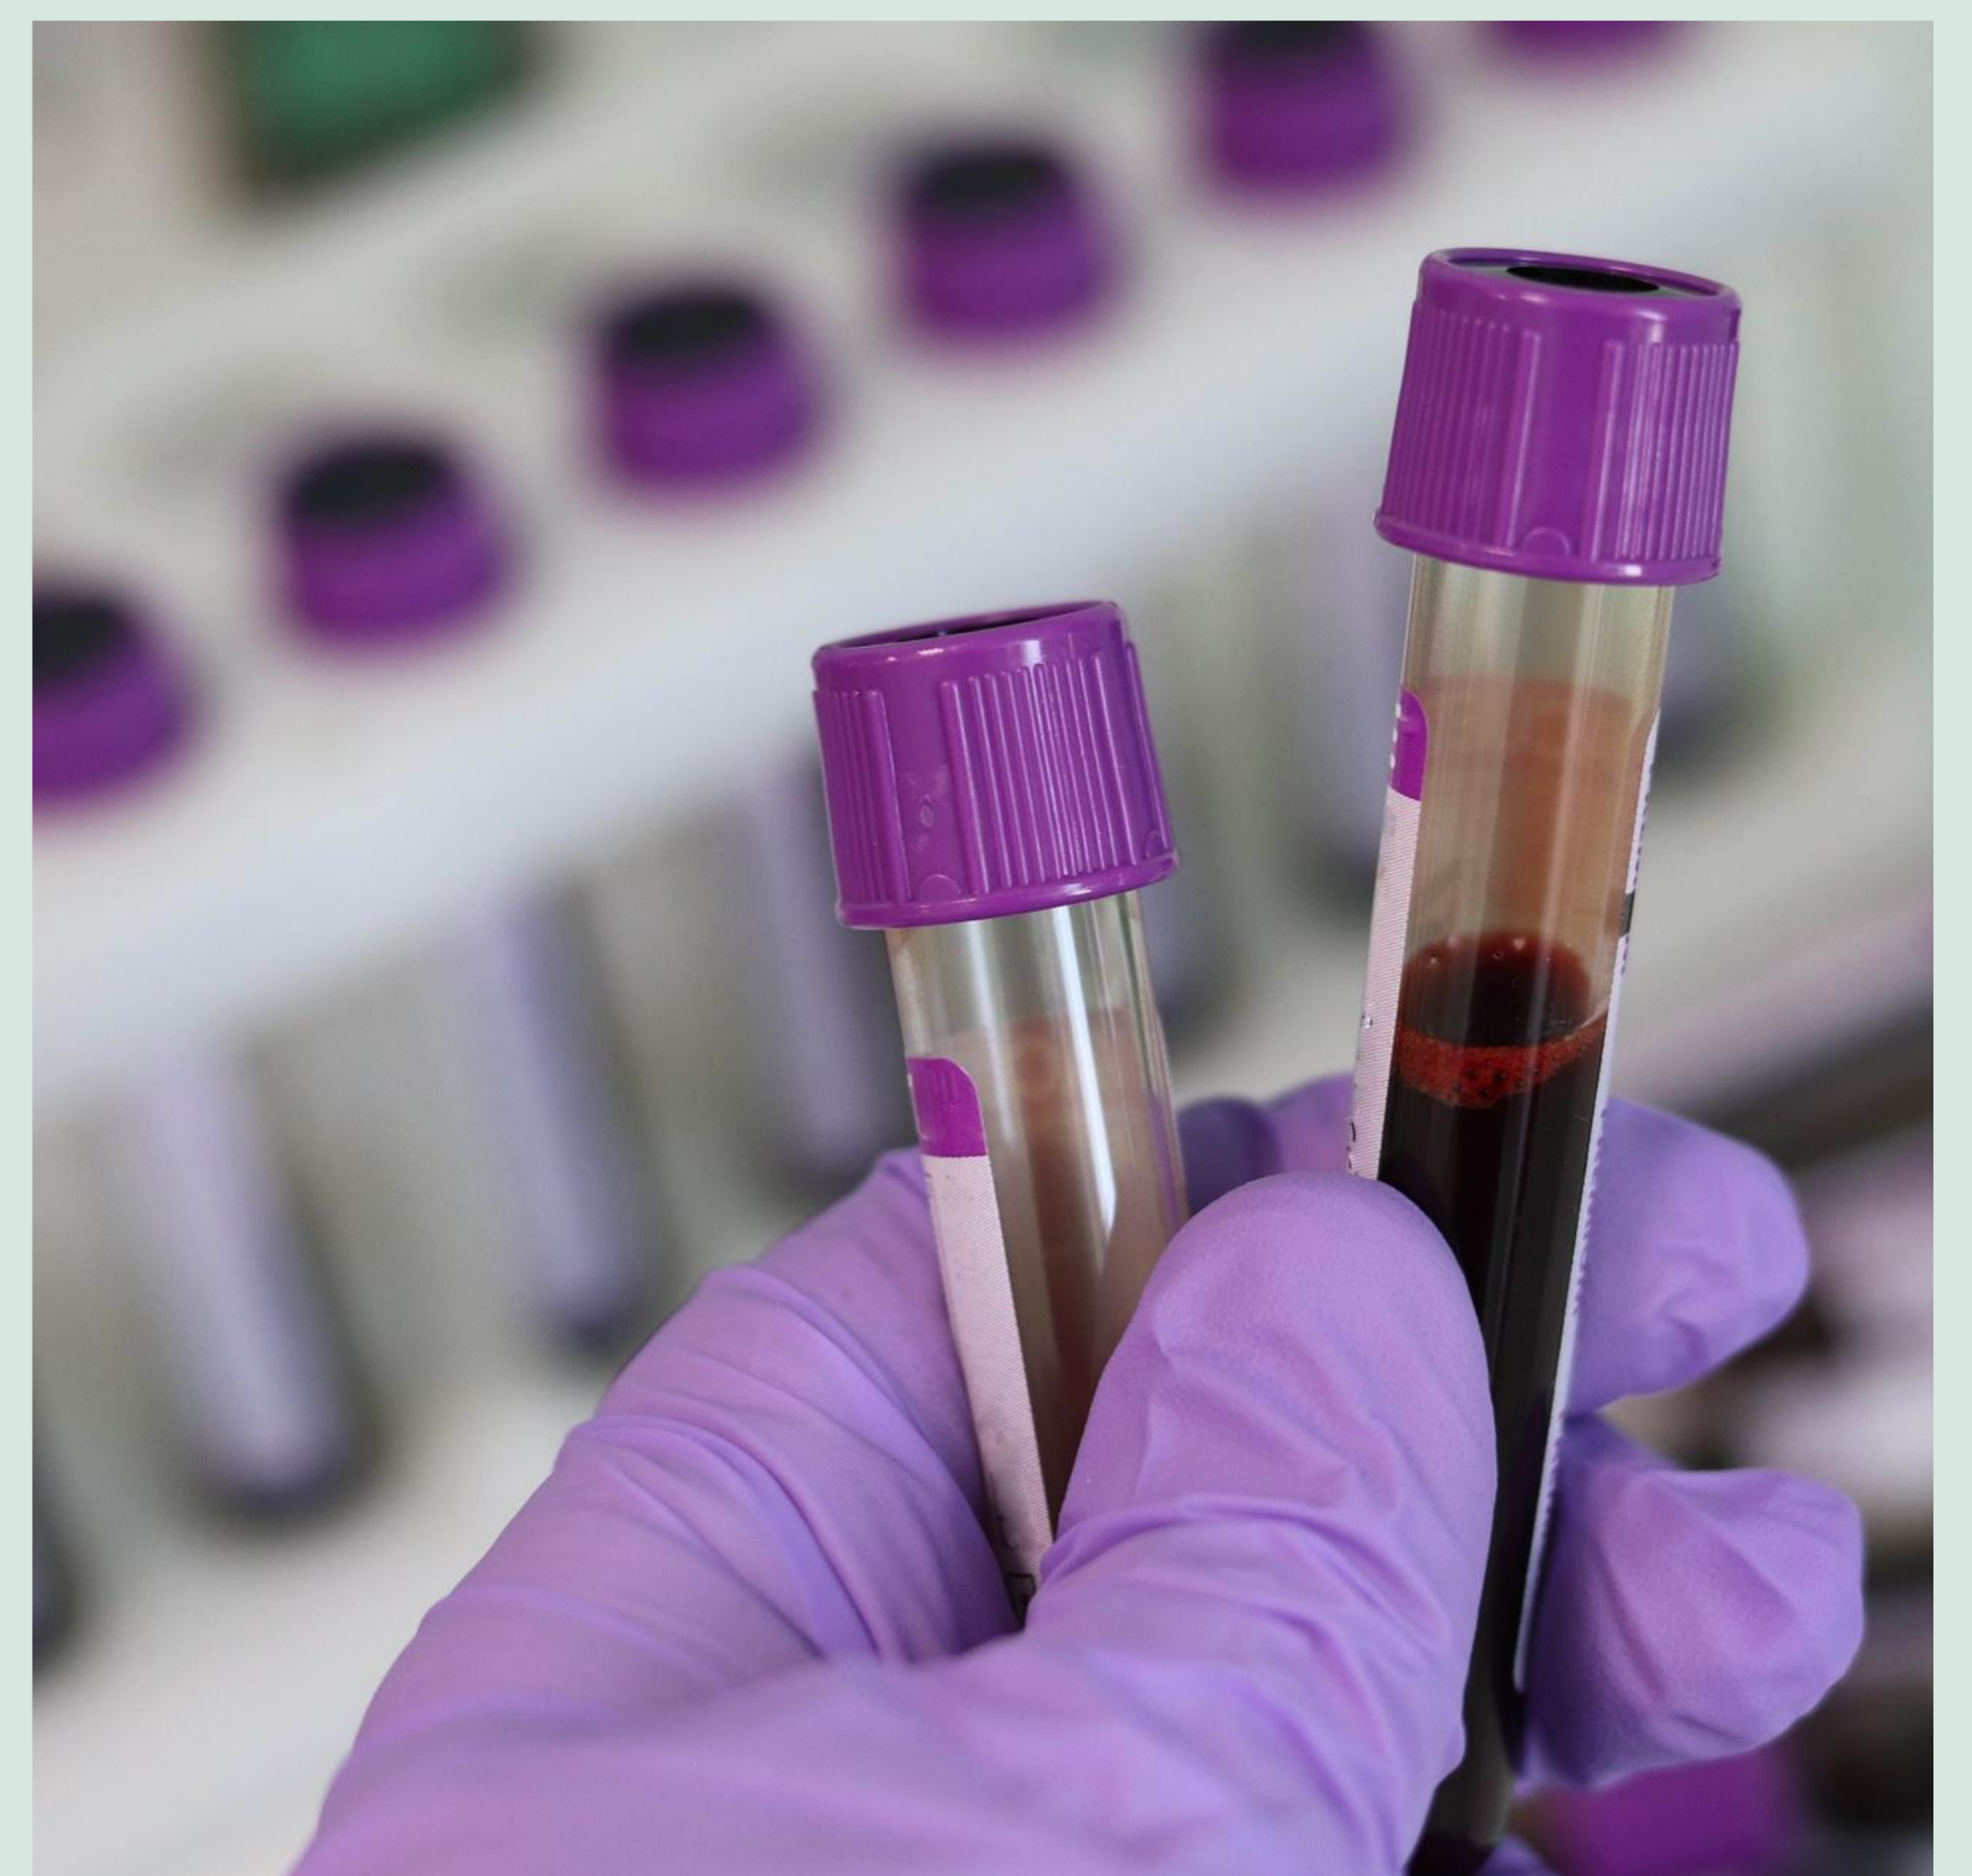

- member information about courses and seminars
- prioritized for registration at course provided by EpiHealth
- access to networks and expertise
- access to networks for recruitment
- contact persons/tutors for support in applications
- increased visibility of your own research

How do I become a member of the EpiHealth network?

To apply for membership in SRA EpiHealth you need to send an email to: miriam.sjodahl_jakobsen@med.lu.se

Then you will be listed for membership as well as in the LUCRIS database (applies to Lund University).

Being a member means no individual fee for you.
